

Data from CDPH				
County: Mendocino	Classification	Value	Current Value	Current Date
Context				
Cumulative case count		206	299	7/30/20
Cumulative death count		0	8	7/30/20
Case doubling time (days)		21.8 days	15	7/30/20
Elevated disease transmission				
Case rate per 100,000 population over 14 days (3 day lag)	Moderately Concerning	92.7	155.1	7/30/20
Case rate per 100,000 population over 14 days, excluding prison cases (3 day lag)	Moderately Concerning	92.7	155.1	7/30/20
Overall testing positivity over 7 days (PCR only, 7 day lag)	Moderately Concerning	4.30%	4.34%	7/30/20
Average number of tests per day (per 100,000 population) over the past 7 days (with 7 day lag)	Moderately Concerning	184.6	229.4	7/30/20
Change in hospitalization				
Percent change in the 3-day average daily number of confirmed COVID-19 patients currently hospitalized		0%	-6.7%	7/30/20
Percent change in the 3-day average daily number of confirmed COVID-19 new admits & conversions minus new onset		0%	0.00%	7/30/20
Percent of hospitalized patients that are COVID+	Less Concerning	10%	7.04%	7/28/20
Count of hospitalized patients that are COVID+		6	5	7/28/20
Percent of ICU patients that are COVID+		11.10%	8.33%	7/28/20
Count of ICU patients that are COVID+		1	1	7/28/20
Healthcare capacity				
Percent of medical/surgical beds currently available	More Concerning	17.10%	45.34%	7/28/20
Percent of ICU beds (excluding NICU beds) currently available	Less Concerning	43.80%	92%	7/28/20
Percent of ventilators currently available	Less Concerning	100%	96.67%	7/28/20
Percent of hospitals with >14 days of PPE on hand	More Concerning	0%	67%	7/28/20
Vulnerable populations				
Percent change in the number of confirmed covid-19 cases among SNF residents in the past 7 days (compared to the 7 days prior)				
Percent change in the number of confirmed covid-19 cases among staff working at SNFs in the past 7 days (compared to the 7 days prior)				
Percent of SNFs with >14 days of PPE on hand
