

## **Multiple Benefit Selection**

Indicate which benefit(s) are associated with each category

*Eligible projects must have multiple benefits. The Technical Advisory Committee (TAC) has ranked the 5 main benefit categories . Assign multiple benefits to each category below in order to assist TAC in refining the multiple benefits associated with each category.*

<b><u>Categories</u></b>	<b><u>Benefits</u></b>	
<u>Environment</u>	1 - Decreased Turbidity <i>Improved water clarity and fish habitats</i>	2 - Surface Water Supply <i>For community and the environment</i>
<u>Water Supply</u>	3 - Decreased Flood Risk	4 - Wetland Creation <i>Provides stormwater treatment &amp; critical habitat</i>
<u>Water Quality</u>	5 - Riparian Enhancement <i>Improved aquatic species habitat. Reduction in streambank erosion.</i>	6 - Employment Opportunities
<u>Community</u>	7 - Recreation Area Development	8 - Instream Flow Improvement <i>Increases stream flow during dry season</i>
	9 - Reduced Sewer Overflow <i>Keeps nutrients and pathogens out of creeks</i>	10 - Decreased Sediment Loading <i>Improved water clarity and fish habitats</i>
<u>Flood Management</u>	11 - Groundwater Supply <i>Help maintain aquifer levels</i>	12 - Nonpoint Source Pollution <i>Decreased pollution from construction sites, and non-visible pollutants from streets and parking lots</i>
