As a homeowner and resident in the Mitchell Creek Cannabis Overlay area, I wish to express my objection to the proposed zoning changes. While I do not object to Cannabis cultivation and am glad to have the industry come out of the shadows I don't think this or any other form of industrial agriculture are suitable for our area. Though zoned as RR2, most of the lots on my street are one acre or less and many in the area are even smaller. The impacts of commercial cultivation would be too great in such a densely populated area.

Sincerely,  
Richard Jacobs
