To Mendocino County Planning & Building Commissioners,

I am opposed to this tower. I have lived in Mendocino County since 1978.

I am a mother, teacher, tax payer and vote here.

Mendocino County adopted the Precautionary Principle Policy #43 on June 27, 2006. Please do not make any decisions until all have read this policy. See

<https://www.mendocinocounty.org/home/showdocument?id=1926>

You say: "The Wireless Facility will serve the community with High Speed Broadband Wireless Internet, Mobile Phone Services, and enhance public safety."

I disagree and will list additional comments below. Many citizens can not speak up in person as they are so sensitive to radiation that they can not be in this room.

AT&T wants to install a cell tower on land belonging to the AT&T Corporation.

The cell tower planned for Manchester would be surrounded by Manchester State Park and is next to a KOA campground and the highly scenic Highway

<https://www.activistpost.com/2019/03/becausefirefighters-the-international-association-of-firefighters-iaff-opposes-cell-towers-and-antennas-on-stations-due-to-health-risks-this-is-why-they-shouldnt-be-installed-near-homes.htm>

And the LA School District, the second largest in the country, has banned WiFi from all their classrooms out of concern for children and staff. Computers will be hard-wired, and all WiFi gadgets are banned.

Please read the APPEAL to stop 5G on Earth and in Space before you adopt this plan. There are 90,566 signatories from at least 168 countries as of May 15, 2019. <https://www.5gspaceappeal.org/the-appeal>

It would be good to know if it is possible to colocate 5G on these towers as we need to keep Mendocino County residents safe! If that is the case then we can not permit this tower.

The system is rigged if the public has no say about what we feel are safe emissions as denial on the basis of radio frequency emissions is prohibited if those emissions are below the standards as determined by the Federal Communications Commission (FCC). The emissions tolerated here are much higher than the emissions tolerated in Europe.

Thanks for considering my comments,  
Annemarie Weibel, Albion
