To help expedite the septic permit process, the Division of Environmental Health (DEH) recommends property owners request their site evaluator to notify DEH when they plan to conduct any site testing. DEH will then be able to work with your site evaluator on your property to identify and resolve potential issues. This cooperation could expedite the septic permit process and reduce the potential for delay of your project. Your site evaluator should provide DEH with adequate advance notice (15 days) and driving directions to your property.
