MENDOCINO COUNTY CROP REPORT 2004

The last standing hop kiln in the Ukiah Valley is pictured on the cover. Recently preserved by owners Charles and Nancy Sawyer, the kiln is a landmark reminder of the valley's agricultural heritage. Built in the early 1900's, the redwood-clad kiln was one of dozens in the county used for drying hops. The old kiln sits at the northern end of the valley, between the Russian River and Highway 101. There are only two hop kilns known to remain in the entire county. The other is at the Milone Family Winery south of Hopland.

Hops were first grown in Mendocino County as early as 1858. Up until Prohibition the county was a major producer of hops. During this time, Mendocino County became the US center of hop production. The town of Hopland, in southern Mendocino County, was named for the vine that drove the local economy. After World War II, pears and wine grapes replaced hops.

A.G. KAWAMURA, SECRETARY CALIFORNIA DEPARTMENT OF FOOD AND AGRICULTURE

and

THE HONORABLE BOARD OF SUPERVISORS OF MENDOCINO COUNTY

The **total gross agricultural value** for commodities produced in 2004 was **\$174,015,300**, a 7% decrease from 2003. The leading category was **timber** with a value of **\$66,605,200**. Agricultural production, excluding timber, had a value of **\$107,410,100**, which is a decrease of 9% from 2003.

Winegrapes, the second leading crop continued to decrease for the 4th year in a row. The value of **\$60,141,500** was a decrease of 15% from 2003. The only categories that did show an increase from 2003 were nursery and vegetable production.

This crop report represents only the <u>gross</u> value to the growers. It does not reflect any net income, costs of production, or packinghouse charges.

I would like to express my sincere gratitude to all the people, in particular Kim Gradin and Caralyn Gulseth, without whose help this report would not be possible. They include all the growers, packers, processors, my staff, the U.C. Cooperative Extension Service, and other government agencies.

Respectfully submitted,

David Bengston Agricultural Commissioner/Sealer

FOREST PRODUCTS

TIMBER	2004	2003
Log Production (board feet)	109,548,000	112,568,000
Total Stumpage Value, net	\$40,995,100	\$40,354,100
Total Value at Mill, gross	\$66,605,200	\$68,496,100

- Calendar year 2004 experienced a very slight decrease in harvest yields for Mendocino County from the
 previously reported year. The harvest level continues to reflect the continued inability of the California
 Department of Forestry and Fire Protection to harvest timber from Jackson Demonstration State Forest.
- 2) The average price for stumpage based on the information provided by the Board of Equalization is approximately \$375/mbf for the timber harvested within Mendocino County. This again reflects a modest increase from the 2003 value of \$358/mbf.
- 3) The combined value of delivered value at the mill includes both stumpage (\$375/mbf) and logging and hauling cost (\$250/mbf) for a total value of \$625/mbf = \$66,605,184.
- 4) Mendocino County is ranked fifth in the state of timber producing counties behind Humboldt, Siskiyou, Shasta, and Plumas counties. This change in ranking reflects national forest timber becoming more available during the past year.
- 5) However, given the high economic value associated with redwood, Mendocino ranks third in the state in total timber value (Humboldt is ranked first, Siskiyou is 2nd).

Data based on information from Gregory A. Giusti, U.C. Cooperative Extension.
