

Mendocino County

FEB 11 2020

Good morning, Mark,

Planning & Building Services

Yes, please, do post that as part of public comments for the project. It should be known how many people who live right next to the proposed tower do not want it there because of overwhelming scientific medical research showing how dangerous Radiofrequency Electromagnetic Radiation is to the health and well-being of humans and the environment.

Best Regards,  
Melissa Finley  
Gualala

Good Evening Melissa -

I'll make note of this in the project file. Did you want this posted as part of public comments for the project?

Mark,

I just wanted to note that whoever filled out the response to the original CDP got it wrong; GMAC was NOT in agreement. I voted against this permit, and there were over a dozen residents in the audience begging the GMAC to deny the petition. I was the only one who voted with the people, the rest voted against them and for the cell tower. I strongly, STRONGLY tried to pass a resolution AGAINST this petition.

Have you by any chance read of the case being brought against the FCC?

Are you aware that those FCC Guidelines are well onto being over 30 years out of date? That they only tested for thermal radiation? On the effects of using a 30 year old cell phone for only 30 minutes a day? That the current FCC Regulation has nothing to do with cell tower exposure to Radiofrequency Electromagnetic Radiation 24 hours a day/365 days a year?

Here's a website showing the case against the FCC Guidelines.

<https://childrenshealthdefense.org/news/robert-kennedy-jr-assembles-legal-team-to-sue-fcc-over-wireless-health-guidelines/>
