March 13, 2020

Department of Planning and Building Services Commission Staff, County of Mendocino  
860 N. Bush St.  
Ukiah, CA 95482

To the Planning and Building Services Commission Staff:

I am writing to urge you **NOT to permit AT&T Mobility/Epic Wireless' 4G wireless communication facility on Pine Mountain.** Numerous controlled scientific studies have confirmed that 2G, 3G and 4G technologies can cause sperm and testicular damage, negative neuropsychiatric effects, including changes to electrical activity in the brain, cellular DNA damage and calcium overload in humans as a result of exposure to EMFs. See the May 11, 2015 EMFScientist.org's letter to WHO:

<https://www.emfscientist.org/index.php/emf-scientist-appeal>

In addition, deploying a 4G cell and microwave tower paves the way for the deployment of 5G technology. 5G technology generates radiofrequency radiation that can also damage DNA and lead to cancer and cause oxidative damage resulting in premature aging. It can disrupt cell metabolism and potentially lead to other diseases through the generation of stress proteins.

**I do not want you to expose the residents of Mendocino County to these health risks. While you are trying to avoid harm to our citizens from coronavirus, you must also protect them from EMF related harms.**

Please DENY the Use Permit.

Thank you.

Sincerely,

Robin Goldner
