Board of Supervisors

This is in reference to the request of AT&T to build and operate a wireless communication facility consisting of a 143 ft. tower with 12 antennae, equipment and cabinet, generator, microwave dish and gravel and paved access route. This is proposed to be located on Pine Mountain where my husband and I live plus our adopted son and his wife and their two small children under three years old. The location of this tower would be at 20201 Manzanita Dr., Willits, CA 95490.

I am very strongly opposed to having this built in our area, because of the negative clinical evidence of sick and injured human beings. Clinical evidence shows the damage of DNA, cells and organ systems in a wide variety of plants and animals, and epidemiological evidence that the major diseases of modern civilization like cancer, heart disease and diabetes are in a large part caused by electromagnetic pollution, this is based on literature of well over 10,000 peer-reviewed studies. The affects are detrimental to little children. For the benefit of us all I am asking you not to allow AT&T to use Pine Mountain for this project.
Sincerely, Mary Caudle
