Planning & Building Services

To: Mendocino County Planning Commission  
From: Marilyn & William Boosinger  
Date: 14 April 2020

We are strongly opposed to allowing AT&T/Epic Wireless LLC to construct a wireless communication tower in the planned location. The Negative Declaration regarding the proposed tower is woefully inadequate in addressing the impacts of this project. Environmental degradation, private property devaluation, earthquake and fire hazards, and the deleterious effect of EMF radiation on human and animal health have not been taken into consideration. Are these vital concerns of less import than the convenience of a snappier cell phone experience that could be achieved with the use of fiber optic lines?

Furthermore, this meeting, which was to have been a *public* hearing, should have been postponed until the public could actually attend in person in order to interact with the decision makers that, may we remind you, represent *We the People*. We exhort you to not allow the profits of a multinational conglomerate holding company to take precedence over the right to quality of life for our community.

Please find attached two additional pages of petition signatures in addition to those previously submitted by Cynthia Raiser Jeavons. As she mentioned in her letter to the Commission, the opportunity to collect even more signatures was curtailed by the current pandemic isolation protocols adopted by the county.

Respectfully,  
Marilynn Boosinger  
William Boosinger  
28110 Poppy Drive, Willits
