Dear Planning & Building Department & Planners,

Do not under any circumstances approve any type of wireless communications systems in this country, especially during this time when we cannot move about and discuss the issues in person.

This is not a matter to take lightly nor one to be made without complete information from all sides of the issue. Those who propose establishing this manner of communication, who will gain profits the fastest way they possibly can, are not giving substantial scientific information to verify that their approach is safe, while there are many legitimate scientist who are warning of dire consequences to human health from the installation of radar towers to support the current approach for profit wireless companies are proposing. Scientist who also concur that fiber optics installation can deliver the same improvements to online communications without the health dangers the radar towers will generate. Maybe take longer to install but much safer and worth the time to assure the well being of all living species on this planet including us humans.

Just to note, there are numerous scientists now concurring there is a link to the health devastation that we are seeing with CV19, pointing out that Wuhan rolled out 5G six months ago, followed by Spain and Italy, and of course much of New York and many other large cities in the US have also rolled out 5G.

There was recently a NY doctor working on the front line who posted a message on Facebook declaring the health issues they are seeing is not CV19 and they are not sure what they are dealing with and asked viewers to pass the information. Though he was not saying the cause is wireless the fact he is saying what he is seeing is not CV19, and there is no clear knowledge of what they are treating, might make a connection to the possibility of the link the scientist are making between wireless and the effects we are seeing that is not actually the results of CV19, before we agree to blanket our county with wireless towers and Wifi radar waves.

Note: When Vice President rolled out the idea of the web, there soon was a small fee added on each of our phone bills to pay for the fiber optic infrastructure to be installed.

With the health concerns in mind watch the following informative information which is just a smidgen of the information that causes real concern about 5G.

Since you are at home like the rest of us with not a lot to do, now is the time to get well informed about the issues you are making decisions about that will have major effects on all of our lives, as individuals and all future generations to come.

This time with scientific warnings of the peril we will unleash if we go forward with wireless communications ill thought out plan for profit, lets listen to the scientist and avoid the same results of global warming we are now facing because we did not listen to the scientist warnings about fossil fuels.

Finally, DONOT approve for all citizens to be subjected to the real possible results the scientific experts in these various links are telling us.

<https://m.youtube.com/watch?v=F0NEaPTu9ol&feature=share> a Ted Talk by one of the developers of wireless technology.

<https://healthimpactnews.com/2019/judge-orders-british-man-opposing-5g-released-from-jail-attempts-to-silence-him-failed/> This link has a video 5G Apocalypse - The Extinction Event, that is interestingly filmed so will not boor you, with many of the professional scientist who were the developers of Radar talking about real issues and health concerns of the roll out of 5G.
