Dear Mr. Schultz:

Please consider this letter in opposition to the proposed wireless communication facility adjacent to the Pine Mountain residential neighborhood as identified above.

This project will have an adverse effect on an entire section of this area, an area that shares the existing problems of limited water, a single narrow access road, episodes of very high wind and the constant threat of extreme fire danger.

The increased truck traffic, construction noise and the mass of this huge (undoubtedly brightly lit) tower will have a negative impact on the people who live here. There seems to be no reason to locate this tower so close to a populated hillside except to decrease the construction costs to the companies who will be profiting from this for years to come.

Sincerely,
Frances A. Grasse
Ridgewood Rd.
