Hello,

I am a resident and property owner, in Pine Mt. Estates area of Mendocino county. I have lived here since July of 1991. We do not have Television, because of interference from the trees. The cell phone service is intermittent, and A. T. & T. is **S L O W** in repairing land lines because they don't make as much money repairing these lines, due to the copper wiring involved. (By the way, I am an A.T. & T. retiree, and when I worked for them, in a major city, if you didn't have dial tone...that was **unacceptable**..and drew immediate attention from the repair department) Last year, I was without dial tone for a week...not even a priority these days) No apologies, no credit....nothing. In any case, I don't understand what people that don't live in the immediate area, are concerned about....They already have cell and Internet service. We have a poor excuse for it. I'm in favor of a new cell tower, due not only to my needs, but many other locals. I know business owners that operate completely by their smart phones, and after this pandemic is over, more people will be working from home. This alone, demands a much better quality of service for us, the paying public. We need to get what we pay for. Please consider Pine Mt.'s needs rather than people who already have great service. Thank you,

Kathleen Covellone
