Presenter/s: Greg DeForrest of Callan Associates began with education regarding U.S. Domestic Equity and manager structure. He referenced a report prepared by Callan stating that 38% of MCERA's target asset allocation is US Domestic Equity and the Russell 3000 index is MCERA's benchmark. Discussion included terminology and manager styles, volatility and default risk, and the longstanding Small Cap tilt in the portfolio. Mr. DeForrest reviewed the performance of Large, Mid, and Small Cap, growth vs value, and Large Cap, Mid Cap, SMID Cap, and Small Cap Broad Equity Styles vs the Russell 2000 Index. MCERA's current US Equity manager structure and performance was also reviewed. The benefit to reducing managers, simplifying structure, current manager styles, and tracking error were discussed.

Mr. DeForrest referenced the general guiding principles of investment structure and reviewed alternative structures prepared by Callan. Discussion included staff and trustee structure preferences, the current number of managers, and the need for simplicity. Dr. Wilbanks explained MCERA's year long process of establishing the target asset allocation and that this is the fourth asset category to review. The allocation to Real Estate did change a few months ago and Callan is currently working on manager searches in International Emerging Markets Equity and in International Small Cap Equity.

The board discussed preferences for different alternative investment structures and Mr. DeForrest agreed that additional alternatives could be prepared and reviewed at next month's board meeting. Dr. Wilbanks confirmed that the alternative structures would be weighted 70% Large Cap and 30% in Mid Cap and Small Cap, would include between 50% to 100% passive in Large Cap, would consider different mixes of managers and combinations of indexes.

Board Direction: Callan will prepare and present additional alternative manager structures at the next board meeting.
