#### Scope of Work:

Uninstall, remove and properly dispose of the existing southern-most HVAC unit from the Mendocino County Retirement Office roof. Provide new replacement unit of equal or better performance rating including complete installation and start-up with interface to current control system(s). Provide and install new electrical, mountings, flashing(s), adapter curb, conduits, disconnect, and control panel. Notification and barricades must be posted in advance if a parking area will be closed during use of crane. Connection to existing gas service to be galvanized pipe. Provide and install new copper condensate lines (40 LF+/-) from units to existing drains, on new DURA-BLOKS (or approved equivalent) for each of the HVAC units located on the Retirement Office roof. Work shall be in compliance with all applicable codes, Title 24, and industry standards. Acceptable manufacturers include American Standard, Trane, Bryant, or approved equivalent. Connection and integration to existing control system required. Mount to existing roof curb, providing weatherproof/ watertight attachment. All mechanical, supports and attachments are to be unit specific, new and exterior commercial grade.

Where existing is not within specification, out of code compliance, or has deteriorated past projected service life (notify the County before proceeding). The contractor is required to obtain a building permit and meet the requirements thereof.
